OVIESA OBOH

Full-Stack & Systems Engineer

Hanover, United States | 4433607942 | oviesao@icloud.com

PROFESSIONAL SUMMARY

Versatile Full-Stack & Systems Engineer with a strong foundation in building scalable web applications, automated data pipelines, and cloud infrastructure. Experienced in designing relational database schemas, deploying production environments on AWS, and bridging modern software engineering with robust systems administration.

WORK EXPERIENCE

Freelance Software Developer | Upwork, Remote **MAR, 2023 - PRESENT**

Managed full-cycle SDLC for international startups, translating business goals into robust database schemas, secure cloud infrastructure, and scalable full-stack MVPs. Architected cloud deployments and optimized database performance, while maintaining a 100% Job Success Score through comprehensive technical documentation and network-conscious system design.

Full Stack Web Developer | YAAANA, Remote **JUL, 2023 - AUG, 2024**

Led database migration, cloud infrastructure planning, and requirements gathering to modernize a legacy platform. Collaborated with global user groups to translate preservation goals into robust database schemas, secure network-integrated wireframes, and scalable full-stack web features.

PROJECTS

Scalable WordPress AWS Cloud Deployment | github.com/oviesa/wordpress-aws-deployment

- Description: Deployed production-ready web infrastructure on AWS utilizing EC2, RDS, VPC security groups, and automated backups.
- Tools / Technologies: AWS (EC2, RDS, VPC), Linux, Apache, MySQL, PHP

ERP Data Warehousing & Analytical Schema | github.com/oviesa/erp-data-warehousing-schema

- Description: Architected a Kimball star-schema data warehouse integrating enterprise ERP and CRM source data across Medallion layers.
- Tools / Technologies: SQL Server, T-SQL, Data Modeling, Star Schema, Data Warehousing

B2B Lead Analytics & Enrichment Pipeline | github.com/oviesa/b2b-lead-analytics-pipeline

- Description: Engineered an automated pipeline utilizing web scrapers and LLMs to clean, research, and enrich B2B profiles.
- Tools / Technologies: TypeScript, AI APIs, Web Scraping, Node.js

SQL Server Data-Driven Web Application | github.com/oviesa/sql-server-web-app

- Description: Developed a full-stack data interface interacting with a Microsoft SQL Server backend to manage dynamic workflows.
- Tools / Technologies: C# (.NET Core), SQL Server, HTML/CSS, JavaScript

EDUCATION

B.S Information Technology | Towson University **2024**

M.S. Applied Artificial Intelligence | University of Maryland, Global Campus (Enrolled) **EXPECTED GRAD: MAY, 2029**

SKILLS & TECHNOLOGIES

Languages & Frameworks: Python, JavaScript, TypeScript, C# (.NET Core), Java, PHP, R, HTML5, CSS3, React, Redux, Node.js

Data Engineering & Analytics: SQL (T-SQL, PL/pgSQL), PostgreSQL, MySQL, Data Modeling, ETL Pipelines, Data Warehousing, Power BI, Tableau, Web Scraping

Cloud, Systems & Infrastructure: AWS (EC2, S3, RDS, VPC), Linux (Ubuntu), Bash, Apache Web Server, Git, PuTTY, Database Administration
